Journal of Molecular Catalysis, 40 (1987) 383 - 387

Subject Index of Volume 40

Acetate
  phenyl; zeolite-catalyzed rearrangement of, 231
  new technique of cell entrapment in cellulose acetate beads, 261
Acetylenic compounds
  Pt complex-catalyzed carbonylation of, 295
Acidity
  structure-breaking effect of metal ions influencing, of anhydrous acid, 23
Acids
  anhydrous acid; structure-breaking effect of metal ions influencing acidity of, 23
  and esters; Ru-catalyzed carbonylation reactions of alcohols to, 71
  perchloric acid media; mechanism of Ru(III) catalysis in *N*-bromosuccinimide oxidation of some glycols in, 49
Activation
  of H by Cu in its ground and excited atomic states; importance of non-additive effects on chemisorption and catalysis, 37
Alcohols
  ethanol; effects of catalyst concentration in carbonylation of, in aqueous medium, 229
  ethylene glycol; role of amide solvents in formation of, from synthesis gas, 223
  some glycols; mechanism of Ru(III) catalysis in *N*-bromosuccinimide oxidation of, in perchloric acid media, 49
  and olefins and CO; synthesis of ketones and esters from, by using Ru–iodide catalysts, 243
  Ru-catalyzed carbonylation reactions of, to acids and esters, 71
  and water; remarkable difference of, from secondary amines in reactions with $C_6H_5COPdX[P(C_6H_5)_3]_2$ (X = I, ClO_4) under CO, 333
Alkanes
  influence of hydrocarbon structure on hydrogenolysis of, over Rh/alumina catalysts, 93
Alkenes, Olefins
  advances in hydroformylation of, containing functional groups, 129
  bicyclo[2.2.1]hepta-2,5-diene; cyclodimerization of, by rhodium carboxylates, 57
  and CO and alcohols; synthesis of ketones and esters from, by using Ru–iodide catalysts, 243
  cyclic dienes and aromatic hydrocarbons; hydrogenation, dealkylation and cracking reactions of; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$ as heterogeneous catalyst precursor, 65
  1-hexene; hydrogenation and isomerization of, in presence of $[Rh(\text{di-isocyanobiphenyl})_2{}^+Cl^-]_n$; heterogeneous catalysis with coordination polymers, 1
  norbornene; Ni-catalyzed dimerization of, 281
  olefin isomerization reaction promoted by electrogenerated cationic nickel hydrides; electroanalytical investigation on, 9
  polyunsaturated hydrocarbons; highly dispersed Rh/polyphosphine metal catalysts; steric control of selectivity in hydrogenation of, 211
Alkylation
  allylic; effect of supports on regio- and stereoselectivity in; metal oxide-supported molybdenum carbonyl catalyst in liquid phase, 183
  hydrogenation, dealkylation and cracking reactions of cyclic dienes and aromatic hydrocarbons; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$ as heterogeneous catalyst precursor, 65
Alkynes
  and heterocumulenes; Co-catalyzed cyclo-cotrimerization of, 267
  and nitriles:
    Rh-catalyzed synthesis of pyridines from, 337
    synthesis of pyridines from, catal-

© Elsevier Sequoia/Printed in The Netherlands

yzed by polymer-anchored Rh complexes, 359
Pt complex-catalyzed carbonylation of acetylenic compounds, 295
Alumina
influence of hydrocarbon structure on hydrogenolysis of alkanes over Rh/alumina catalysts, 93
Amide solvents
role of, in formation of ethylene glycol from synthesis gas, 223
Amines
kinetics and mechanism of oxidation of diphenylamine by Tc(VII) catalyzed by Cu(II) ion, 305
secondary; remarkable difference of alcohols and water from, in reactions with $C_6H_5COPdX(C_6H_5)_3]_2$ (X = I, ClO_4) under CO, 333
Anodic electrocatalyst
structure, properties and optimization of; RuO_2/TiO_2 on Ti, 311
Aromatic compounds
aromatic hydrocarbons and cyclic dienes; hydrogenation, dealkylation and cracking reactions of; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$ as heterogeneous catalyst precursor, 65
benzene; hydroconversion of, over ZSM-5 zeolite, 113
diphenylamine; kinetics and mechanism of oxidation of, by Tc(VII) catalyzed by Cu(II) ion, 305
hydridotetrakis(diethyl phenylphosphonite)(Co(I); photoinduced catalytic reactions of, 289
phenyl acetate; zeolite-catalyzed rearrangement of, 231
phenyl salicylate; mechanistic diagnosis of induced catalysis in aqueous cleavage of, in presence of borate buffer, 195
pyridines:
p-xylene reaction with Co–Br–pyridine catalyst; reaction in aqueous system, 235
Rh-catalyzed synthesis of, from alkynes and nitriles, 337
synthesis of, from alkynes and nitriles catalyzed by polymer-anchored Rh complexes, 359
$[Rh(diisocyanobiphenyl)_2{}^+Cl^-]_n$; hydrogenation and isomerization of 1-hexene in presence of; heterogeneous catalysis with coordination polymers, 1
Borate buffer
mechanistic diagnosis of induced catalysis in aqueous cleavage of phenyl salicylate in presence of, 195
Bromine
mechanism of Ru(III) catalysis in *N*-bromosuccinimide oxidation of some glycols in perchloric acid media, 49
p-xylene reaction with Co–Br–pyridine catalyst; reaction in aqueous system, 235

Carbon monoxide
and olefins and alcohols; synthesis of ketones and esters from, by using Ru–iodide catalysts, 243
remarkable difference of alcohols and water from secondary amines in reactions with $C_6H_5COPdX[P(C_6H_5)_3]_2$ (X = I, ClO_4) under, 333
Carbonyl
metal oxide-supported molybdenum carbonyl catalyst in liquid phase; effect of supports on regio- and stereoselectivity in allylic alkylation, 183
Carbonylation
effects of catalyst concentration in, of ethanol in aqueous medium, 229
Pt complex-catalyzed, of acetylenic compounds, 295
Ru-catalyzed, reactions of alcohols to acids and esters, 71
Carboxylates
rhodium; cyclodimerization of bicyclo[2.2.1]hepta-2,5-diene by, 57
Catalyst concentration
effects of, in carbonylation of ethanol in aqueous medium, 229
Cell entrapment
new technique of, in cellulose acetate beads, 261
Cellulose acetate beads
new technique of cell entrapment in, 261
Chemisorption
and catalysis; importance of non-additive effects on; activation of H by Cu in its ground and excited atomic states, 37
Cleavage
aqueous; mechanistic diagnosis of induced catalysis in, of phenyl

salicylate in presence of borate buffer, 195
Cobalt
Co-catalyzed cyclo-cotrimerization of alkynes and heterocumulenes, 267
photoinduced catalytic reactions of hydridotetrakis(diethyl phenylphosphonite)Co(I), 289
p-xylene reaction with Co–Br–pyridine catalyst; reaction in aqueous system, 235
Copper
importance of non-additive effects on chemisorption and catalysis; activation of H by, in its ground and excited atomic states, 37
kinetics and mechanism of oxidation of diphenylamine by Tc(VII) catalyzed by Cu(II) ion, 305
Cracking reactions
and hydrogenation and dealkylation of cyclic dienes and aromatic hydrocarbons; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$ as heterogeneous catalyst precursor, 65
Cyclo-cotrimerization
Co-catalyzed, of alkynes and heterocumulenes, 267
Cyclodimerization
of bicyclo[2.2.1]hepta-2,5-diene by rhodium caboxylates, 57

Dimerization
cyclo-; of bicyclo[2.2.1]hepta-2,5-diene by rhodium carboxylates, 57
Ni-catalyzed, of norbornene, 281
Dispersion
and catalytic activity of Mo supported on Y zeolites, 83
highly dispersed Rh/polyphosphine metal catalysts; steric control of selectivity in hydrogenation of polyunsaturated hydrocarbons, 211

Electrocatalyst
anodic; structure, properties and optimization of; RuO_2/TiO_2 on Ti, 311
Electrogeneration
electroanalytical investigation on olefin isomerization reaction promoted by electrogenerated cationic nickel hydrides, 9
Esters
and acids; Ru-catalyzed carbonylation reactions of alcohols to, 71
cellulose acetate beads; new technique of cell entrapment in, 261
and ketones; synthesis of, from olefins, CO and alcohols by using Ru–iodide catalysts, 243
phenyl acetate; zeolite-catalyzed rearrangement of, 231

Fischer–Tropsch synthesis
using $[NEt_3H]^+[HFe_3(CO)_{11}]^-$–potassium hydroxide–Y zeolite system as catalyst precursor, 119

Glycol
ethylene; role of amide solvents in formation of, from synthesis gas, 223
mechanism of Ru(III) catalysis in *N*-bromosuccinimide oxidation of some glycols in perchloric acid media, 49

Heterocumulenes
and alkynes; Co-catalyzed cyclo-cotrimerization of, 267
Hydroconversion
of benzene over ZSM-5 zeolite, 113
Hydroformylation
advances in, of olefins containing functional groups, 129
Hydrogen
importance of non-additive effects on chemisorption and catalysis; activation of, by Cu in its ground and excited atomic states, 37
Hydrogenation
and dealkylation and cracking reactions of cyclic dienes and aromatic hydrocarbons; $(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$ as heterogeneous catalyst precursor, 65
highly dispersed Rh/polyphosphine metal catalysts; steric control of selectivity in, of polyunsaturated hydrocarbons, 211
and isomerization of 1-hexene in presence of $[Rh(diisocyanobiphenyl)_2^+Cl^-]_n$; heterogeneous catalysis with coordination polymers, 1
Hydrogenolysis
influence of hydrocarbon structure on, of alkanes over Rh/alumina catalysts, 243

Iodide
synthesis of ketones and esters from olefins, CO and alcohols by using Ru–iodide catalysts, 243
Iron
Fischer–Tropsch synthesis using $[NEt_3H]^+[HFe_3(CO)_{11}]^-$–potassium hydroxide–Y zeolite system as catalyst precursor, 119
Isomerization
and hydrogenation of 1-hexene in presence of [Rh(diisocyanobiphenyl)$_2^+Cl^-]_n$; heterogeneous catalysis with coordination polymers, 1
olefin reaction; electroanalytical investigation on, promoted by electrogenerated cationic nickel hydrides, 9

Ketones
and esters; synthesis of, from olefins, CO and alcohols by using Ru–iodide catalysts, 243

Metal oxide
-supported molybdenum carbonyl catalyst in liquid phase; effect of supports on regio- and stereoselectivity in allylic alkylation, 183
Molybdenum
dispersion and catalytic activity of, supported on Y zeolites, 83
metal oxide-supported molybdenum carbonyl catalyst in liquid phase; effect of supports on regio- and stereoselectivity in allylic alkylation, 183
Montmorillonite catalysts
phosphinated; high resolution solid state MAS ^{31}P NMR spectra of, 327

Nickel
-catalyzed dimerization of norbornene, 281
(η^5-C_5H_5)$NiRu_3(\mu$-H)$_3(CO)_9$ as heterogeneous catalyst precursor; hydrogenation, dealkylation and cracking reactions of cyclic dienes and aromatic hydrocarbons, 65
electrogenerated cationic nickel hydrides; electroanalytical investigation on olefin isomerization reaction promoted by, 9
Nitriles
and alkynes: Rh-catalyzed synthesis of pyridines from, 337
synthesis of pyridines from, catalyzed by polymer-anchored Rh complexes, 359
Norbornene
Ni-catalyzed dimerization of, 281

Olefins: see Alkenes
Oxidation
of diphenylamine by Tc(VII) catalyzed by Cu(II) ion; kinetics and mechanism of, 305
N-bromosuccinimide; mechanism of Ru(III) catalysis in, of some glycols in perchloric acid media, 49

Palladium
remarkable difference of alcohols and water from secondary amines in reactions with $C_6H_5COPdX[P(C_6H_5)_3]_2$ (X = I, ClO_4) under CO, 333
Phosphorus
highly dispersed Rh/polyphosphine metal catalysts; steric control of selectivity in hydrogenation of polyunsaturated hydrocarbons, 211
high resolution solid state MAS ^{31}P NMR spectra of phosphinated montmorillonite catalysts, 327
photoinduced catalytic reactions of hydridotetrakis(diethyl phenylphosphonite)Co(I), 289
Photoinduced catalytic reactions
of hydridotetrakis(diethyl phenylphosphonite)Co(I), 289
Platinum
Pt complex-catalyzed carbonylation of acetylenic compounds, 295
Polymer(s)
-anchored Rh complexes; synthesis of pyridines from alkynes and nitriles catalyzed by, 359
coordination; heterogeneous catalysis with; hydrogenation and isomerization of 1-hexene in presence of [Rh(diisocyanobiphenyl)$_2^+Cl^-]_n$, 1
Potassium
Fischer–Tropsch synthesis using $[NEt_3H]^+[HFe_3(CO)_{11}]^-$–potassium hydroxide–Y zeolite system as catalyst precursor, 119

Proteins
kinetics of protein modification reactions; free energy changes in protein affinity labelling, 255

Rhodium
/alumina catalysts; influence of hydrocarbon structure on hydrogenolysis of alkanes over, 93
-catalyzed synthesis of pyridines from alkynes and nitriles, 337
highly dispersed Rh/polyphosphine metal catalysts; steric control of selectivity in hydrogenation of polyunsaturated hydrocarbons, 211
polymer-anchored Rh complexes; synthesis of pyridines from alkynes and nitriles catalyzed by, 359
$[Rh(diisocyanobiphenyl)_2^+Cl^-]_n$; hydrogenation and isomerization of 1-hexene in presence of, heterogeneous catalysis with coordination polymers, 1
rhodium carboxylates; cyclodimerization of bicyclo[2.2.1]hepta-2,5-diene by, 57
Ruthenium
-catalyzed carbonylation reactions of alcohols to acids and esters, 71
$(\eta^5\text{-}C_5H_5)NiRu_3(\mu\text{-}H)_3(CO)_9$ as heterogeneous catalyst precursor; hydrogenation, dealkylation and cracking reactions of cyclic dienes and aromatic hydrocarbons, 65
–iodide catalysts; synthesis of ketones and esters from olefins, CO and alcohols by using, 243
Ru(III) catalysis in *N*-bromosuccinimide oxidation of some glycols in perchloric acid media; mechanism of, 49
RuO_2/TiO_2 on Ti; structure, properties and optimization of anodic electrocatalyst, 311

Spectra
high resolution solid state MAS ^{31}P NMR, of phosphinated montmorillonite catalysts, 327

Structure-breaking effect
of metal ions influencing acidity of anhydrous acid, 23
Succinimide
mechanism of Ru(III) catalysis in *N*-bromosuccinimide oxidation of some glycols in perchloric acid media, 49
Synthesis
Fischer–Tropsch, using $[NEt_3H]^+[HFe_3(CO)_{11}]^-$–potassium hydroxide–Y zeolite system as catalyst precursor, 119
of ketones and esters from olefins, CO and alcohols by using Ru–iodide catalysts, 243
of pyridine from alkynes and nitriles catalyzed by polymer-anchored Rh complexes, 359
Rh-catalyzed, of pyridines from alkynes and nitriles, 337
Synthesis gas
role of amide solvents in formation of ethylene glycol from, 223

Technetium
kinetics and mechanism of oxidation of diphenylamine by Tc(VII) catalyzed by Cu(II) ion, 305
Titanium
structure, properties and optimization of anodic electrocatalyst; RuO_2/TiO_2 on Ti, 311

Water
and alcohols; remarkable difference of, from secondary amines in reactions with $C_6H_5COPdX[P(C_6H_5)_3]_2$ (X = I, ClO_4) under CO, 333

Zeolite
-catalyzed rearrangement of phenyl acetate, 231
dispersion and catalytic activity of Mo supported on Y zeolites, 83
Fischer–Tropsch synthesis using $[NEt_3H]^+[HFe_3(CO)_{11}]^-$–potassium hydroxide–Y zeolite system as catalyst precursor, 119
hydroconversion of benzene over ZSM-5 zeolite, 113
